WRAPPED BUSHING, LOW-MAINTENANCE

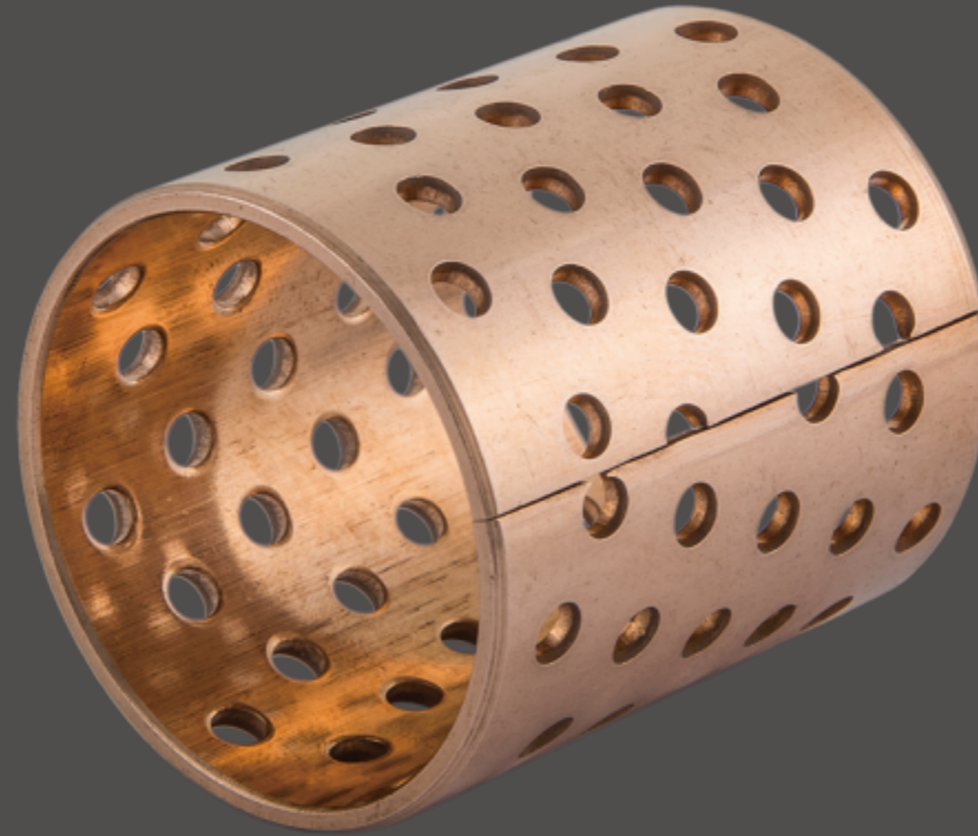

VIPLUS

HIGH PERFORMANCE BEARING SOLUTIONS 睿

Introduction

CuSn8,CuSn6 CUSTOM BRONZE BUSHING

One of China leading suppliers of slide bearings,
plain bearings and bronze bushings. World class
logistics!

Bronze Bearings made of CuSn8/CuSn6 with Lubrication Indents

WRAPPED BUSHING, LOW- MAINTENANCE

Custom Bronze Bushing Solutions Diamond shaped lubrication indents

AVAILABILITY

Bearing forms available in standard dimensions

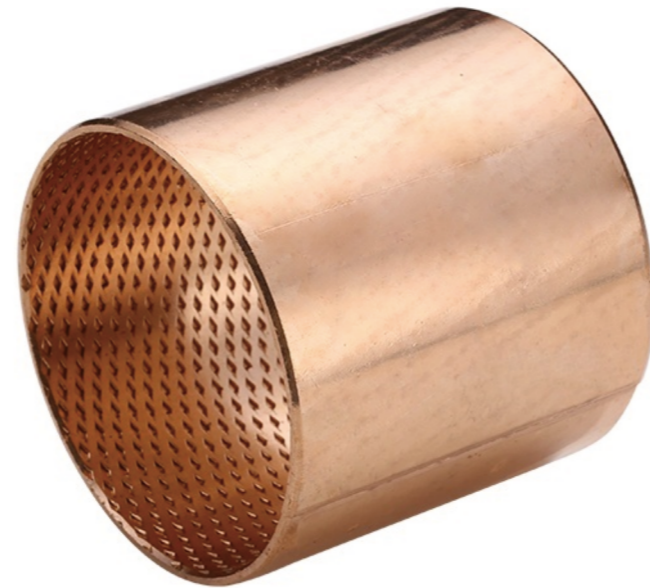

Cylindrical bushes

Flanged bushes

Thrust washer

Flanged washers

Sliding plates

BRONZE BUSHINGS SLIDING BEARINGS

PROPERTIES

Economic solution for bronze bearing application due to a thin wall thickness. High load capability and good stability with low abrasion. Suitable for rough working conditions, good corrosion resistance.

CUSTOM BRONZE BUSHINGS

a cold formable homogenous bronze (CuSn8/CuSn6)

MATERIAL

Materials Support material CuSn8P alternative CuSn6P available

Tolerance details Housing \varnothing H7 Bushing inner- \varnothing after mounting H9 Shaft tolerance f7 to h8 Shaft material bushings, diamond oil hole or lubricating depots surface ;Economic solution for bronze bushing application due to a thin wall thickness bearings. High load capability and good stability.

Custom Quality Cast, Bushing, & Self-lubricating Bearings VIPLUS is a leading supplier of quality bronze bearings, has one of the world's largest inventories of bronze bearings in a wide variety of inch and metric sizes. We offer a broad range of bearing types, from sleeve and flange to disc, plate and thrust, solid and cored bar in sintered, cast bronze and steel back-PTFE-lined materials. Our bearings can be oil impregnated, dry or graphite-filled to meet a broad range of application requirements.

BRONZE BUSHINGS

RANGE OF APPLICATION

THIN WALLED BRONZE BUSHINGS

Agriculture machinery, truck cranes & Forest- and constructional machinery, cranes, forklifts, hoisting equipment etc. suitable for impact loads.

MADE -TO-ORDER

The Premier Source for Bronze Bushings Online

CHARACTERISTICS

Bearing material made of solid bronze strip with indents for lubrication
Good wear resistance, suitable for rough conditions
Optimum performance under relatively high loads and low speeds

MADE IN CHINA
